# Future Wireless Communications

## Special Session

October 08-11, 2002  
Croatia, Italy

### *Call for Papers*

Special session on Future Wireless Communications will be held aboard the luxury ship "Dubrovnik" traveling on the route Split (Croatia) - Venice (Italy) - Ancona (Italy) - Dubrovnik (Croatia) in the frame of the 10th International Conference on Software, Telecommunications and Computer Networks - SoftCOM 2002.

The increasing popularity of wireless networks indicates that most of future networking structures will be based on wireless networking technologies (Satellite, Ad Hoc, UMTS, ..). We cordially invite speakers who wish to present original papers on the following subjects associated with Wireless Communication

- \* Interaction between different layers of mobile/wireless systems
- \* Protocols for Ad Hoc Wireless Networks
- \* Performance of mobile/wireless networks and systems
- \* Transport/Data Link Protocols for Mobile Satellite Communications
- \* Security and privacy of mobile/wireless systems
- \* QoS in Wireless Networks
- \* Heterogeneous Wireless Networks
- \* Traffic & Resource Management in Satellite Networks
- \* Integration between Wired and Wireless (Satellite, Ad Hoc, UMTS, ..) Networks
- \* Services and Applications for Wireless Communications

Each day of the conference the ship will be anchored in one of the ports on the route, and overnight it will sail towards the next destination. This provides participants with the opportunity to share ideas in close contact with their colleagues and to enjoy the pleasant and inspiring ambience while visiting the ports along the beautiful Adriatic coast. During the conference the car deck will serve as an exhibition arena for exhibitors of software and telecommunication products.
