

Technically-cosponsored by:

Advancing Technology
for Humanity

In cooperation with:

International
Symposium Committee

Symposium co-chairs:

[Antonio Capone](#)
Politecnico di Milano, Italy
and
[Josip Lorincz](#)
University of Split, Croatia

Committee members:

Honggang Zhang, Zhejiang University, China
Jinsong Wu, Bell Laboratories, China
Ken Christensen, University of South Florida, USA
Lingjia Liu, University of Kansas, USA
Luca Chiaraviglio, Università di Roma "Sapienza", Italy
Marco Ajmone Marsan, Institute IMDEA Networks, Spain
Marco Conti, Institute for Informatics and Telematics, Italy
Mario Pickavet, Ghent University, Belgium
Michela Meo, Politecnico di Torino, Italy
Ulrich Barth, Alcatel-Lucent/Bell Labs, Germany

21st International Conference on Software Telecommunications and Computer Networks SoftCOM 2013

Split - Primosten, Croatia, September 18 – 20, 2013

SYMPOSIUM ON:

GREEN NETWORKING & COMPUTING

Symposium Co - Chairs:

Antonio Capone and Josip Lorincz

Politecnico di Milano - DEI, Italy (capone@elet.polimi.it) / University of Split – FESB, Croatia (lorinc@fesb.hr)

Call for Papers

The Symposium on “Green Networking and Computing” will be held in the frame of the 21st International Conference on Software, Telecommunications, and Computer Networks (*SoftCOM 2013*) in the attractive ambience of the Croatian side of Adriatic coast in September 2013. Since 2010, in the frame of Symposium the forth Special Session on green networking is organised. Conference is technically co-sponsored by the IEEE Communication Society (*ComSoc*) and the Symposium is organized in cooperation with the IEEE ComSoc Technical Subcommittee on Green Communications and Computing (*TSCGCC*) and supported by the European Commission FP7 *TREND* (Towards Real Energy-efficient Network Design) project.

The topic of “green networking” is attracting growing attention for economic, energetic, and environmental reasons. The rapidly increasing amount of power consumed by ICT, as well as the energy bills of service providers, contributes to the economic reasons. According to a number of studies, ICT alone is responsible for between 2 and 10% of world power consumption, due to the ever-increasing diffusion of electronic devices. Communication networks, including the Internet and wireless networks, represent a non-negligible part of the energy consumption of ICT. In addition, the carbon footprint of ICT devices due to energy consumption and the activities related to their entire lifecycle contributes to global warming.

In the very last years, energy-saving techniques are being considered for communication networks with new generation devices and network management approaches exploiting algorithms and protocols for adapting the network to the varying traffic load. The Symposium on “Green Networking and Computing” aims to serve as a platform for researchers and visionaries from academia, research labs, and industry from all over the world. Sharing ideas, views, results, and experiences in the field of green wired and wireless networking is what the “Green Networking and Computing” Symposium is intended to be about. Anything from theoretical and experimental achievements to innovative design and management approaches, prototyping efforts, and case studies is of interest.

Topics of interest include, but are not limited to the following:

- Power consumption models of networking infrastructure
- Power measurements and data from empirical studies of communication networks
- Techniques for reducing power consumption in data centers
- Hardware and architectural support for reducing power consumption
- Energy efficient network management
- Green network design
- Applications of green networking technologies and principles
- Cross-layer optimizations for reducing energy consumption
- Optimization of energy consumption in optical networks
- Energy-efficient protocols and protocol extensions
- Energy-efficient transmission technologies
- Energy-efficient peer-to-peer networking and overlays
- Energy-efficient cloud computing
- Green wireless access networks
- Green wired access networks
- Green future Internet
- Energy cost models for network operators
- Energy-efficient sensor networks
- Renewable energy sources for wired and wireless access networks
- Antenna design and transmission technologies for reducing energy consumption

Accepted papers will be published in the conference proceedings and indexed in the IEEE Xplore.

IMPORTANT DATES

Complete manuscript due:	May 15, 2013
Notification of acceptance:	July 5, 2013
Camera-ready manuscript:	September 1, 2013

More information about the Conference including details on the submission process and authors kit is available on the website:
