Workshop on Information and Telecommunications Technologies

Workshop on ICT will provide an open forum for information and telecommunications technology professionals and engineers to discuss new and emerging systems, standards and services, and their applications in telecommunications and information systems. We are soliciting technical contributions presenting state of art in the wide spectra of contemporary ICT systems and applications including the measurements set-ups, original developed applications as well as demonstrations of ICT prototypes. SoftCOM 2014 will offer a pleasant open space in the Conference hotel to support the presentation of systems and applications. Topics of interest are the same as research topics of SoftCOM - see the [Call for SoftCOM'14 General Conference](#).

Authors are invited to submit their proposals through the EDAS website at <http://www.fesb.hr/softcom>. Paper submissions should be prepared in the two-column IEEE format. Accepted papers will be published in the Workshop proceedings (not in IEEE Xplore).

Steering Committee

Milutin Kapov and Matko Šarić
co-chairs:

University of Split, Croatia

Zoran Blažević
University of Split, Croatia

Julije Ožegović
University of Split, Croatia

Miljenko Mikuc
University of Zagreb, FER

Petar Šolić
University of Split, Croatia

IMPORTANT DATES

Complete manuscript due

15 June, 2014

Notification of acceptance

15 July, 2014

More information about the SoftCOM 2014 Conference including authors kit are available on the website: www.fesb.hr/softcom

Conference Secretary: Petar Solic, University of Split, Croatia (softcom@fesb.hr)
